# Benefits of AstralPool Hot Tubs

## Water and Health

The effects of water through hydromassage can treat pain and relax the most sensitive parts of the body.

## Stress reduction guaranteed

A good emotional balance is achieved through the chromotherapy, music therapy and aromatherapy systems.

## A new living space

Enjoy a unique moment, of peace and relaxation, and special moments with your partner, family or friends.

## Unique experiences

Have a spontaneous relaxing evening, enjoy the benefits of a vigorous massage after playing sports, enjoy a massage at home every day of the week, immerse yourself in the sound of the flowing water...

## European Manufacturing and Warranty

AstralPool has been designing and manufacturing hot tubs for 25 years. The designs of the hot tubs are constantly updated so that they always offer the best comfort and improve your quality of life.

Components

Acrylic

Frame

# Hydromassage

A massage designed for each specific part of your body

### Localised pressure massage

This type of massage offers continuous pressure on a specific part of the body, eliminating any muscle contractures.

### Anti-stress rotation massage

Performs a circular motion with its rotary jet. Ideal for combating the stresses caused by poor posture or occasional strains.

### Draining rotation massage

Thanks to the impact of the water on the body, it creates a lipoactive and body-firming effect on the body.

### Reflex foot massage

Foot massages help to alleviate muscle and joint pains. This type of application produces a pleasurable sensation and helps you to sleep.

### Air massage

The air bubbles have a relaxing effect on all of the muscles in the body.

# Energy efficiency

## EcoSpa, the best thermal insulation for your hot tub

The EcoSpa option is a vital element that has a direct impact on the hot tub's maintenance costs. EcoSpa insulation helps to retain heat and reduce the number of hours of operation of the electric heating. A properly-insulated hot tub uses less electricity. By combining the use of an isothermal cover with the EcoSpa system, you can keep the power consumption of your hot tub down to as little as €20 per month.

### An efficient European hot tub:

With EcoSpa, to keep the water at 37°	5.28 kWh
Without EcoSpa, to keep the water at 37°	10.80 kWh

- 1- Heavy duty ABS base.
- 2- Second insulation layer. Panel with high thermal and acoustic insulation.
- 3- Polyurethane thermal insulation layer with a density of 30%.
- 4- Insulating cover with a thickness of 100 to 130 cm.

# An entertainment centre

## Chromatherapy

Chromatherapy is the name of the non-conventional medicine which seeks to treat ailments and diseases with colours. It has a biological and psychological effect. The coloured light uses physiological stimulus to stimulate spontaneous responses from the body.

# Filtration and disinfection of water

The hot tub's water filtration is vital to prevent bacteria and other microbes from easily growing in the water. The filtration is the first step in the hot tub's water treatment and is performed before the chemical treatment. There are several types of filtration: pressure cartridge filter, floating skimmer with cartridge filter and sand filter for professional systems. The automatic disinfection system uses the effects of the ozone, by injecting ozone particles into the water through a mixing chamber, permanently eliminating contaminants.

## Aroma therapy

It provides real healing properties and completes the range of benefits created by the hot tub. The natural aromas are released from the hot tub, achieving harmony and balance.

## Music therapy

Music therapy seeks to use the properties and sound of the music to help achieve a balance of body and mind.

Cartridge filter filtration system.

## Advanced Range

A range of hot tubs designed for the most demanding user. Ergonomic hot tubs with high performance and configuration options.

## Swimspa Range

Swimspas are small residential pools. Versatile, powerful and compact. A health and wellness center available all year round.

## Essential Range

The Essential range seeks to balance functionality, performance and cost.

## Commercial Range

Hot tubs designed for commercial premises such as gyms, wellness centres, hotels etc. A large range of options and finishes that meet every need. Hot tubs with an acrylic and mosaic finish.

Our range  
of hot tubs

# Advanced Range

A large model with a complete hydromassage circuit. It has five positions distributed over a large bathing space. The five positions are composed of two loungers and three seats. Each position has a different massage, allowing you to complete a full hydromassage circuit.

## Atlantida 70 Hot Tub

Our leading model

## Chromatherapy centre

Carry out your chromatherapy sessions in the hot tub. The hot tub has 5 LED lights that light up the interior of the hot tub. Each of the hot tub's external controls light up in sync with the interior of the hot tub.

## BENEFITS

### High performance system

Each of the massage pumps has been designed to achieve maximum power and optimal consumption. The hot tub has two powerful massage water pumps that feed the hot tub's 54 jets and 2 waterfalls and the 14 air relaxation nozzles.

### Cabinet with a modern design

A sleek, even and screwless cabinet. The modern look of the Atlantida 70 Hot Tub cabinet is sure to impress. It is available in three different colours: Graphite, Thunder and Creek.

# Essential Range

## A hot tub with basic equipment

The Select hot tub and the models in the Essential range provide a balance between performance, features and cost. Hot tubs with a basic format, designed to offer the user a customised thermal system.

## BENEFITS

### Ergonomics and design

Its design allows your figure to comfortably adapt to each of the hot tub's position. The lounger and seats have been designed for your comfort, with smooth lines and the necessary depth and inclination for high-quality bathing.

The Select hot tub model has five seating positions and a fully-equipped lounger. A fully ergonomic model which provides a different massage in each of its positions. It has two waterfalls for cervical massages and a complete reflexotherapy massage area where you can receive a full foot massage.

## Select Hot Tub

Our leading model

### Silent filtration

The filtration circuit is composed of a silent filtration system and a separate circuit, allowing the hot tub's water to be continuously filtered and cleaned at a low cost. The pump's low power consumption allows long periods of filtration. As it is a silent pump, this can be done at any time of the day.

# Commercial Range

## High-quality finish

Each of the hot tubs in the Commercial range is manufactured with the finest materials to ensure the product's performance in your business.

## Systems with added value

The hot tubs in the Commercial range not only offer the customer a product designed for hydromassages. With its LED lighting options, it can be used as a genuine chromotherapy treatment centre.

## Professional filtration

The Commercial hot tubs' filtration systems are designed for intensive product use. The size of each pump ensures greater durability and reliability. Filtration is performed by professional filtration pumps and sand filters, in order to comply with the most stringent regulations.

The Tokyo model hot tub is designed for highly demanding public facilities. It is the perfect model for anyone who wants to offer their customers a high-quality massage by providing a large bathing space with different positions.
