

CTX-540 AlgaStop special Oxygene

DESCRIPTION:

An algicide compound with non-foaming properties, especially designed to complement the disinfectant action of Oxygen Activated Tablets (0100) and Oxygen activated Granules (100GR) at treatment OXIPOOL, avoiding the proliferation of algae.

PROPERTIES:

Appearance	Liquid
Colour	Green
Density (20°C)	1,11 - 1,13 g/cm ³

CHARACTERISTICS:

Concentrated microbicide.

Does not contribute to the formation of foam in the water.

Totally soluble in water.

Effective in all kinds of filter, sand or diatomite.

Prevents the development of “green water” algae, of black algae, which may form on pool walls and of “yellow” or “mustard” algae.

Causes dead algae and other solids to settle in suspension.

DOSAGE AND INSTRUCTIONS FOR USE:

Treatment OXIPOOL:

Initial Treatment: Add 150 ml. of product per 10 m³ of water.

Maintenance Treatment: Add 50 ml. of product for 10 m³ of water every week.

La información contenida en este folleto es según nuestro criterio correcta. No obstante, como las condiciones en las que se usa este producto caen fuera de nuestro control, no podemos responsabilizarnos de las consecuencias de su mala utilización.

The Initial treatment should be repeated whenever the water does not appear transparent.

This dose is merely meant as a guideline and may be modified according to differing characteristics of the pool, climate, etc.

Pour the necessary dose of product in a container with water and evenly distribute over the pool water surface, preferably during the evening and without swimmers.
