

## CTX-550 Winter Star

### DESCRIPTION:

Product for the maintenance of uncovered pool during the winter period, avoiding the growth of algae and bacteria which cause unclean water calcareous sediments.

### PROPERTIES:

Appearance .....	liquid
Colour .....	bluish green
Density .....	1,11 - 1,15 g/cm <sup>3</sup>
pH .....	0 - 1.5

### CHARACTERISTICS:

Not applicable

### DOSAGE AND INSTRUCTIONS FOR USE:

When the bathing period is over and maintenance has not yet been abandoned, superchlorinate with Dichloroisocyanuric Acid Granules (0200GR (15 grs/m<sup>3</sup>)).

Next day add 5 litres of winter treatment product (0550) for 100 m<sup>3</sup> of water which should have a pH level between 7,2 and 7,6.

Pour the necessary dose of product (0550) directly into the pool. Switch on the filtration system until the chemical has been evenly distributed throughout the pool.

It is recommended that this process be repeated half way through the winter period.
