

CTX-700 Anticalcareous Super

DESCRIPTION:

Product for controlling formation lime and stains due to the iron in swimming pools.

PROPERTIES:

Appearance	liquid
Colour.....	Colourless
Density (20°C).....	1,34 – 1,38 g/cm ³

CHARACTERISTICS:

Avoid the formation of lime encrustations on walls, steps and bottoms of swimming pools due to hard water.

Maintains the water re-circulation circuits, pumps and heat exchanger clean.

Eliminates the lime from filters, aiding filtration.

Avoids the formation of stains in the pool, due to the iron present in the water.

Non-foaming, easy to use product, which helps to maintain the water of the swimming pool more transparent and sparkling, since it maintains tubing and circuits of the whole re-circulation system clean.

Totally compatible with all disinfectants, algacides and biocides (chlorine, oxygen, anti-algae products, etc.) from the INQUIDE range of products.

DOSAGE AND INSTRUCTIONS FOR USE:

Initial Treatment: On beginning the bathing season, add 2 l. of product (0700) to the water of the swimming pool for each 100 m³ of water.

Maintenance Treatment: Add 1 to 2 l. of product each 100 m³ of water once a week.

These dosages are for guidance only and can be modified in accordance with the hardness and the salt contents of the water. In swimming pools with hardness greater than 45 °F and temperatures of 28 °C, the dosage of product should be increased by 25 to 50 %.

Important: Whenever the water contains iron, it is important to add the product (0700) to the water of the swimming pool before chlorination or any oxidation treatment.

Dilute the necessary quantity of product in a recipient with water and spread the solution uniformly over the surface of the swimming pool, keeping the filtering equipment running.
