

CTX-53 Cleaning product for fibre swimming pools

DESCRIPTION:

Liquid cleaning product specially designed for the elimination of calcareous encrustations, organic residues and mineral sediments which form with time and which adhere to the surfaces of swimming pools (beaches, floating lines, steps, etc.) built in polyester and fibreglass.

PROPERTIES:

Appearance	liquid
Colour	orange
Density	1,23 a 1,27 g/cm ³
pH	0

CHARACTERISTICS:

Not applicable

DOSAGE AND INSTRUCTIONS FOR USE:

General cleaning of empty swimming pools.

Apply undiluted product to the surfaces to be cleaned, spreading the product all over walls and bottom. Let the product penetrate for approximately ½ hour and then rinse with abundant water. If the encrustation persists, repeat the operation.

In areas where the incrustation is very acute, it is advisable to assist the action of the product by scrubbing the area with a brush.

Apply the product with a spray gun which does not have misting or sprinkler effect.

Consumption of this product is 20 L. for each 100-m³ volume of the swimming pool.

Recommendations:

Before cleaning the inside of the pool, its surfaces (floor, tiles, ceramic tiles, etc.) must be well dampened with water.

After cleaning with product the surfaces should be rinsed with plenty of water to remove all traces of the product.

If cleaning is carried out in the open air avoid working in direct sunlight and ensure that the product is not allowed to dry.

When the pool is first being cleaned it is recommended that the product be used in its undiluted form.
