

CTX-602 Anticalcareous Eco

DESCRIPTION:

It is a dispersing and scale inhibitor agent developed for use in swimming pools to remove and control scale formation and avoids the formation of stains in the pool, due to the iron present in the water.

PROPERTIES:

Appearance	liquid
Colour	Colourless
Density	1,04 – 1,08 g/cm ³

CHARACTERISTICS:

This product is compatible with the INQUIDE disinfectants, algicides and biocides.

DOSAGE AND INSTRUCTIONS FOR USE:

Initial Treatment: On beginning the bathing season, add 2 l. of product (0602) to the water of the swimming pool for each 100 m³ of water.

Maintenance Treatment: Add 1,5 - 2 l. of product (0602) each 100 m³ of water once a week.

These dosages are for guidance only and can be modified in accordance with the hardness and the salt contents of the water. In swimming pools with hardness greater than 35 °F and temperatures of 28 °C, the dosage of product should be increased by 25 to 50 %.

Important: Whenever the water contains iron, it is important to add the product to the water of the swimming pool before chlorination or any oxidation treatment.

Dilute the required dose of product in a container of water and distribute the solution evenly over the pool surface whilst the filtration equipment is in operation.
