

CTX-41 Flocculant

DESCRIPTION:

A polymer flocculant with great coagulating and flocculating properties. Capable of removing particles in suspension found in pool water.

PROPERTIES:

Appearance	liquid
Colour.....	Colourless
Apparent Density.....	1,18 – 1,22 g./cm ³
pH of a 1% water solution	3.5 – 4.5

CHARACTERISTICS:

- High speed of coagulation.
- Good speed of decanting.
- Satisfactory behaviour at low temperatures.
- Can be used under a wide range of pH levels.
- Elimination of consumption in product for the adjustment of the pH.
- Lesser tendency for provoking phenomena of over dosage.
- Eliminates the metallic ions such as iron and manganese.
- Forms flocculi, which are easily filtered.
- Lower contents of aluminium soluble in treated water.
- Eliminates organic matter.
- Effectiveness in water with high turbidity.
- Improves bacteriological quality of water and therefore reduces consumption of disinfecting chemicals.

DOSAGE AND INSTRUCTIONS FOR USE:

Recovery Treatment:

	Fluidra Comercial España Pintor Velázquez, 10 08213 Polinyà (Barcelona) Spain Tel: 93 713 50 60 Fax: 93 713 41 11 www.certikin.com

Ensure the filtration equipment is switched off and the pool empty of bathers before adding 10 ml. for m³ of water.

Pour the necessary dose of product in a container with water and distribute over the pool water surface.

After 8 hours eliminate the flocs formed and deposited on the bottom of the swimming pool with a pool cleaner.

Treatment for day to day maintenance:

This can be carried out by means of a metering pump, injecting 0,5 ml. of product for m³. of circulating water prior to the filter.

PRESENTATION:

In 1, 5 and 25 Lts. drums.
