# Benefits of AstralPool Hot Tubs

## Water and Health

The effects of water through hydromassage can treat pain and relax the most sensitive parts of the body.

## Stress reduction guaranteed

A good emotional balance is achieved through the chromatherapy, music therapy and aromatherapy systems.

## A new living space

Enjoy a unique moment, of peace and relaxation, and special moments with your partner, family or friends.

## Unique experiences

Have a spontaneous relaxing evening, enjoy the benefits of a vigorous massage after playing sports, enjoy a massage at home every day of the week, immerse yourself in the sound of the flowing water...

## European Manufacturing and Warranty

AstralPool has been designing and manufacturing hot tubs for 25 years. The designs of the hot tubs are constantly updated so that they always offer the best comfort and improve your quality of life.

# Hydromassage

A massage designed for each specific part of your body

## Localised pressure massage

This type of massage offers continuous pressure on a specific part of the body, eliminating any muscle contractures.

## Anti-stress rotation massage

Performs a circular motion with its rotary jet. Ideal for combating the stresses caused by poor posture or occasional strains.

## Draining rotation massage

Thanks to the impact of the water on the body, it creates a lipoactive and body-firming effect on the body.

## Reflex foot massage

Foot massages help to alleviate muscle and joint pains. This type of application produces a pleasurable sensation and helps you to sleep.

## Air massage

The air bubbles have a relaxing effect on all of the muscles in the body.

# Energy efficiency

- 1 Heavy duty ABS base.
- 2 Second insulation layer. Panel with high thermal and acoustic insulation.
- 3 Polyurethane thermal insulation layer with a density of 30%.
- 4 Insulating cover with a thickness of 100 to 130 mm.

## EcoSpa, the best thermal insulation for your hot tub

The EcoSpa option is a vital element that has a direct impact on the hot tub’s maintenance costs. EcoSpa insulation helps to retain heat and reduce the number of hours of operation of the electric heating. A properly-insulated hot tub uses less electricity. By combining the use of an isothermal cover with the EcoSpa system, you can keep the power consumption of your hot tub down to as little as €20 per month.

### An efficient European hot tub:

With EcoSpa, to keep the water at 37°	5.28 kWh
Without EcoSpa, to keep the water at 37°	10.80 kWh

# Nordic Insulation System

The NORDIC INSULATION SYSTEM is the insulation system designed for cold environments that ensures the improved energy efficiency of your hot tub.

The NORDIC INSULATION SYSTEM consists of 10 mm of insulating material, composed of 5 layers. This insulating layer is on the sides and curves of the cabinet, creating an insulating air chamber inside it. The insulating layer that surrounds the entire cabinet is 10 mm thick, with material composed of 5 layers:

- 1 Aluminium
- 2 RC9 Foam + Low Density Polyethylene (with a double layer)
- 3 FONEX non-cross-linked polyethylene foam (20 kg/m3)
- 4 RC9 Foam + Low Density Polyethylene (with a double layer)
- 5 Aluminium

Heat leak test performed with the Nordic Insulation System

# An entertainment centre

## Chromatherapy

Chromatherapy is the name of the non-conventional medicine which seeks to treat ailments and diseases with colours.

It has a biological and psychological effect. The coloured light uses physiological stimulus to stimulate spontaneous responses from the body.

## Aroma therapy

It provides real healing properties and completes the range of benefits created by the hot tub. The natural aromas are released from the hot tub, achieving harmony and balance.

## Music therapy

Music therapy seeks to use the properties and sound of the music to help achieve a balance of body and mind.

## Wifi Touch Panel

The Balboa Wifi Touch Panel is an application for your smart device (Android™ or iPhone®) which allows you to access your hot tub via the internet, wherever you are; whether you are at home or anywhere else, all that you need is a 3G, 4G or WiFi connection to be able to control your hot tub from your mobile phone or tablet.

With the Wifi Touch Panel application, you can make sure that your hot tub is ready whenever you want to have a soak. Instead of having to go outside and press the buttons on the panel, the application allows you to start up the bath and change the settings of your hot tub from your mobile phone or tablet.

The application provides a complete control interface that allows you to set the temperature, activate the massage pumps and even set the filtration cycles.

## Ultraviolet disinfection system

in the Advanced range

The hot tubs equipped with the Ultraviolet system have a UV technology-based disinfection system which, thanks to the ultraviolet (UV) light, destroys the bacteria in the water.

The benefits of the Ultraviolet system are:

- It guarantees fresh, clean and clear water
- Efficient and safe disinfection of water
- The combined chlorine is degraded by the UV-C light
- It protects the water from germs
- It keeps the formation of mould, bacteria and algae under control
- It can reduce the use of chlorine and other chemicals by up to 80%
- It avoids the smell of chlorine and prevents irritation of the skin and eyes (red eyes)
- It is more environmentally friendly than traditional methods

With this system, your hot tub will have a clean and automatic system that eliminates bacteria, mould and algae and will protect your hot tub from germs without any kind of maintenance.

## Advanced Range

A range of hot tubs designed for the most demanding user. Ergonomic hot tubs with high performance and configuration options.

Our range  
of hot tubs

## Swimspa Range

Swimspas are small residential pools. Versatile, powerful and compact. A health and wellness center available all year round.

## Essential Range

The Essential range seeks to balance functionality, performance and cost.

## Commercial Range

Hot tubs designed for commercial premises such as gyms, wellness centres, hotels etc. A large range of options and finishes that meet every need. Hot tubs with an acrylic and mosaic finish.

# Advanced Range

A large model with a complete hydromassage circuit. It has five positions distributed over a large bathing space. The five positions are composed of two loungers and three seats. Each position has a different massage, allowing you to complete a full hydromassage circuit.

## Atlantida 70 Hot Tub

Our leading model

## BENEFITS

### High performance system

Each of the massage pumps has been designed to achieve maximum power and optimal consumption. The hot tub has two powerful massage water pumps that feed the hot tub's 52 jets and 2 waterfalls and the 14 air relaxation nozzles.

### Chromatherapy centre

Carry out your chromatherapy sessions in the hot tub. The hot tub has 5 LED lights that light up the interior of the hot tub. Each of the hot tub's external controls light up in sync with the interior of the hot tub.

### Cabinet with a modern design

A sleek, even and screwless cabinet. The modern look of the Atlantida 70 Hot Tub cabinet is sure to impress. It is available in 4 different colours: Graphite, Thunder, Creek and Butterfly.

# Swimspa Range

Creta is the most compact Swimspa on the market. It has a large bathing space and a complete hydromassage area. At 4 metres long and 2.3 metres wide, it is spacious but compact hot tub: an all-in-one product.

## Swimspa Creta

Our leading model

## BENEFITS

### Maximum Power and Performance

The Swimspa Creta is fitted with equipment that offers unbeatable performance. It is equipped with 52 jets, three massage pumps and a complete LED lighting system.

### Fitness, swimming and rowing

Turn your Swimspa into a health centre: do different exercises with the elastic bands, exercise your body in the rowing zone or comfortably swim inside it, using the pole and harness.

### A swimming pool for the whole year

The Swimspa Creta has a heating system that is perfect for maintaining the desired temperature throughout the year. Enjoy healthy bathing, fun times with your family or fitness sessions at home, with no limits.

# Essential Range

The Select hot tub model has five seating positions and a fully-equipped lounger. A fully ergonomic model which provides a different massage in each of its positions. It has two waterfalls for cervical massages and a complete reflexotherapy massage area where you can receive a full foot massage.

## Select Hot Tub

Our leading model

## BENEFITS

### Ergonomics and design

Its design allows your figure to comfortably adapt to each of the hot tub's position. The lounge and seats have been designed for your comfort, with smooth lines and the necessary depth and inclination for high-quality bathing.

### A hot tub with basic equipment

The Select hot tub and the models in the Essential range provide a balance between performance, features and cost.

Hot tubs with a basic format, designed to offer the user a customised thermal system.

### Silent filtration

The filtration circuit is composed of a silent filtration system and a separate circuit, allowing the hot tub's water to be continuously filtered and cleaned at a low cost. The pump's low power consumption allows long periods of filtration. As it is a silent pump, this can be done at any time of the day.

# Commercial Range

The Tokyo model hot tub is designed for highly demanding public facilities. It is the perfect model for anyone who wants to offer their customers a high-quality massage by providing a large bathing space with different positions.

## Tokyo Hot Tub

Our leading model

## High-quality finish

Each of the hot tubs in the Commercial range is manufactured with the finest materials to ensure the product's performance in your business.

## Systems with added value

The hot tubs in the Commercial range not only offer the customer a product designed for hydromassages. With its LED lighting options, it can be used as a genuine chromatherapy treatment centre.

## Professional filtration

The Commercial hot tubs' filtration systems are designed for intensive product use. The size of each pump ensures greater durability and reliability. Filtration is performed by professional filtration pumps and sand filters, in order to comply with the most stringent regulations.
