

CTX-582 Winter Star Liner Power

DESCRIPTION:

Product for maintenance of open air swimming pools during the winter, preventing strong proliferation of algae and bacteria that make the water unpleasant, as well as the formation of chalky sediments.

This is a highly concentrated product with the following benefits:

Environmentally friendly

- Highly concentrated product.
- Less use of raw materials, packaging and energy in its production.
- 50% saving on CO₂ emissions in transporting it.

Application control and minimum waste management costs

- Exact control of product used (dispenser cap).
- Reduction in waste management cost (Ecoembes).

Minimum occupational risks

- Safe handling and no contact with the chemical product.
- 80% reduction in load weight.
- Easier, cleaner and more convenient.

70% saving on storage and transport space

- Reduction in product volume thanks to its high concentration.

PROPERTIES:

Appearance	Liquid
Colour	Navy blue
pH (concentrated at 20°C).	6.0 - 9
Density (20°C)....	1,065 - 0.05 g/cm ³

Product Technical data sheet

CHARACTERISTICS:

Prevents the proliferation of all kinds of algae.
Non-foaming product.
Compatible with all kinds of disinfection treatments (including PHMB).
Fully soluble in water.
Completely copper-free (does not cause marks in swimming pools with liners, polyester or vinyl).
Compatible with all filter systems.

DISPENSING AND USE:

At the end of the swimming season and before maintenance treatment is suspended, carry out superchlorination with granulated dichloro (0200GR) (15 g/m³).

The next day, add 1 l of product for every 50 m³ of water. The pH value of the water must be between 7.2 and 7.4.

Pour the necessary product dose directly into the swimming pool water. The filtering equipment needs to be switched on long enough to obtain good distribution of the product in the water.

It is advisable to repeat the addition of the product half way through the winter season.
