A new generation of filtration pumps

Victoria Plus Silent VS. A new generation of filtration pumps

The Victoria Plus Silent pump for residential pools comes with a 1 HP or 2 HP motor, has variable speeds and can be automatically controlled.

This pump has been designed for both new-build pools and as a replacement for pumps already fitted.

Significant power savings can be made thanks to the use of variable speeds and the timer. The pump is compatible with the Fluidra Connect platform.

It has a built-in HIM controller with the possibility of mounting it on a wall for better usability.

Bathers experience a greater feeling of well-being due to the reduced noise level.

There are digital inputs and outputs for the smooth running of all pool units, such as the salt chlorinator and heat pump.
