## LOCATE DEALERS

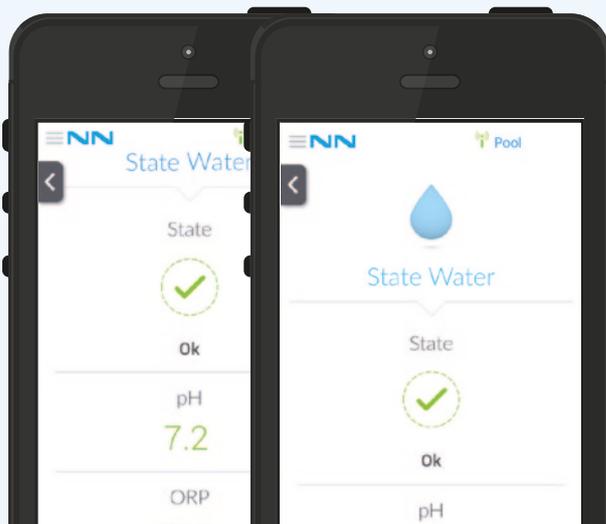

### More convenient for you

The Fluidra Connect app will make life more convenient and easier for you, as you will also be able to locate dealers in your area for requesting your pool maintenance service. Your dealer will be able to control your pool remotely from the Fluidra Connect service platform.

You will also be able to find a full list of dealers on our website at [www.fluidraconnect.com](http://www.fluidraconnect.com)

## BIG ADVANTAGES AND BENEFITS

### Convenience

Manage and control all of your pool settings in real time from any place 24/7 all year around.

### Peace of mind

Your pool will always be in a perfect state of repair. A healthy and safe pool for you and your family.

### Sustainability

Efficient management of water and energy.

More than 100 compatible Fluidra Connect products available.

For the app to work properly you must install the Connect Box and compatible Fluidra Connect products.

# THE SMART SOLUTION FOR THE REMOTE CONTROL OF YOUR SWIMMING POOL

Available on a range of platforms:  
[www.fluidraconnect.com](http://www.fluidraconnect.com)

You can remotely  
control, diagnose and manage your swimming pool thanks to

The Cloud

# BENEFITS

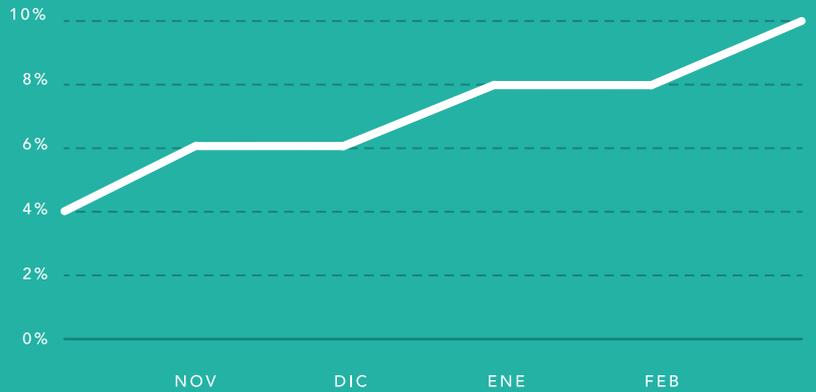

## FOR THE SWIMMING POOL PROFESSIONAL

**New business opportunities**  
through remote management.

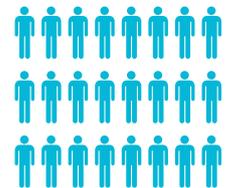

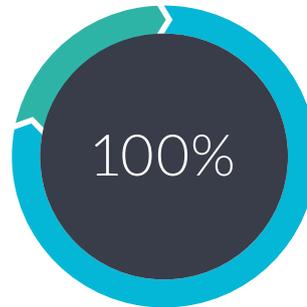

Expand your business professionally, easily and with minimum investment. A new approach to the swimming pool business.

### Greater profits - More benefits

Fluidra Connect eliminates the need to make unnecessary journeys for diagnosing problems. You can manage swimming pools remotely and increase the number of pools you can monitor.

### Exclusive

The rest

This exclusive service is what differentiates us from the rest. An innovative, efficient and inexpensive service.

more satisfied  
**customers**

Improve customer service by directly reducing maintenance costs and increasing efficiency for diagnosing problems with equipment and water quality.

**Welcome to the future**

# FLUIDRA CONNECT SOLUTION

Fluidra Connect is a smart solution that enables end users and pool dealers to control a pool remotely. This makes it possible for pool dealers to check out, manage and control all the pools they have installed from a PC.

Fluidra Connect has two control modes:

- Basic, intuitive control for end users front the app.
- Advanced control for pool dealers from the platform at [www.fluidraconnect.com](http://www.fluidraconnect.com) (optional).

## Connect Box

Connect Box is the brains behind a Fluidra Connect pool installation. Fluidra Connect does not work without Connect Box, which must have a cable or Wi-Fi Internet connection (from a home router, 3G network, etc.).

Code

Std. Pack

Connect Box

66671

1

In cases that the products to be controlled are not compatible with Fluidra Connect, they can be run using a device called a GPIO.

## GPIO

It has 4 digital input and output pins.

Using the GPIO, incompatible products, such as a white spotlight or filtration pump, can be switched on or off and their timers set.

It also displays the status of some devices, such as a pool cover.

Up to 247 GPIOs can be connected to a single Connect Box.

- TWIN CELL system prevents the formation of incrustations on the chlorinator CELL and improves energy efficiency.
- High quality electrodes.
- Salinity alarm with LED indicators.

## Elite

Top-of-the-range unit.

A bubble detector, flow switch and compact probe holder as standard.

Comes with high quality electrodes, has a service life of 15,000 hours under laboratory conditions, and 10,000–12,000 hours under normal conditions.

The Salt levels are controlled through a powerful system of salinity alarms that have different indicators for high and low salt levels.

Polarity inversion regulation current. It has an automatic system that prevents the build-up of limescale on the cell – programmable by users from the control panel.

Production control 0 - 100% (11 current levels).

Total automatic control of water treatment as this chlorinator benefits from the advantages of pH and chlorine control (redox). pH dosing pump not included.

## SALT ELECTROLYSIS AND PH/CL CONTROL

### Smart+

Professional unit. Three external controls (redox, cover and flowmeter) may be adapted (included). Bubble and flow detector, compact electrode holder for pH sensor, injection point of pH minus and flowmeter.

Comes with high quality electrodes, has a service life of 15,000 hours under laboratory conditions, and 10,000–12,000 hours under normal conditions.

Salinity alarm: has different LED indicators for HIGH and LOW salinity. It shows the salt levels needed.

Polarity inversion regulation current.

It has an automatic system that prevents the formation of scale on the electrolysis cells – can be programmed by users from the control panel.

Production control. Eleven production control levels. From 0 to 100%.

Recommended: control pH levels using **36002-36004** machines.

---	--------------	---	---	---

### Smart+ pH

Professional unit. Three external controls (redox, cover and flowmeter) may be adapted (included).

Mass-produced equipment with a bubble detector, flow detector and a 50-1/2 connection collar.

Comes with high quality electrodes, has a service life of 15,000 hours under laboratory conditions, and 10,000–12,000 hours under normal conditions.

Salinity alarm: has different LED indicators for HIGH and LOW salinity. It shows the salt levels needed.

Polarity inversion regulation current.

It has an automatic system that prevents the formation of scale on the electrolysis cells – can be programmed by users from the control panel.

Production control. Eleven production control levels. From 0 to 100%.

Automatic control of pH included. pH dosing pump not included.

Dosing pumps not included.

## SALT ELECTROLYSIS AND PH/CL CONTROL

### Sel Pure

Self-cleaning salt electrolysis through polarity inversion. Salt concentration of 4 g/l. Easy to install and use, it is recommended for pools up to 160 m<sup>3</sup>. Flow detection connector, earthing and salt test strips included. Built-in self-diagnosis function and 0% - 100% production control. Connection for automatic cover. Recommended for indoor and outdoor pools.

		Code	Std. Pack	Standard Weight kg	Standard Volume m <sup>3</sup>
<b>Chlorine production</b>

Up to 160 m <sup>3</sup>	30 g/h	<b>66677</b>	1	6,30	0,025

### pH Pure

Automatic pH regulation system for pools up to 200 m<sup>3</sup> with built-in 2.4 l/h pump. Automatic calibration without tampon solution. Visual operating display.

		Code	Std. Pack	Standard Weight kg	Standard Volume m <sup>3</sup>
Up to 200 m <sup>3</sup>		<b>66674</b>	1	4,4	0,025

### Dual Pure

Self-cleaning salt electrolysis through polarity inversion and automatic pH regulation. Easy to install and use, recommended for pools up to 160 m<sup>3</sup>. 2-in-1 Sel Pure and pH Pure combination in a single device, each one operating separately. Flow detection connector, earthing and salt test strips included. Built-in self-diagnosis function and 0% - 100% production control. Connection for automatic cover. Recommended for indoor and outdoor pools.

# WATER TREATMENT

## SALT ELECTROLYSIS AND PH/CL CONTROL

Salt water chlorinators for commercial pools are becoming popular because they are efficient, practical, safe and well priced. Our wide range of industrial electrolysis systems covers self-cleaning equipment of up to 600 grams/hour of Chlorine, which makes it possible to use saline electrolysis to treat the water at any public use facility.

Main advantages:

- Safety: There is no need to store, handle or dose any chemical products and therefore it is a much safer system. The raw material stored is common salt.
- Savings: The introduction of saline electrolysis systems can bring net savings in operating costs of around 50-60%, with respect to traditional systems.

Peristaltic pump not included.

	EASY SALT	PRO-CHLORE SALT	NATURE SALT
Self-cleaning electrodes	7.000 - 10.000 h	8.000 - 12.000 h	6.000 - 8.000 h
Salinity range	5 - 12 g/l (recommended 5 - 6 g/l)	5 - 12 g/l (recommended 5 - 6 g/l)	1,5 - 3 g/l (recommended 2 - 2,5 g/l)(*)
Production (g/h)	70 - 180	50 - 600	50 - 300

(\*): Operating range 1.5–5 g/l depending on the temperature (28–35 °C) and nominal output (80–100%)

### Easy Salt

Self-Cleaning electrolysis system, for residential and public pool applications use up to 180 g chlorine/hour. Easy Salt is a compact and cost competitive equipment. It has built-in (EXT-1, EXT-1E) or external control options (AP PR 60359-60361-60362, Smart Control 54523-4-5).

## WATER TREATMENT

# ELECTRÓLISIS DE SAL Y CONTROL DE PH/CL

### Pro-Chlore Salt

Our Pro-Chlore Salt range includes EX electrodes that provide the highest level of durability in self-cleaning systems. The Pro-Chlore Salt range with its integrated EXTENSION options (EXT-1, EXT-1E, EXT-2) or external control options (AP PR200, Smart Control) includes a control and regulation system for ORP values (Redox) or ppm, as well as pH, allowing improved management of the equipment and an excellent water quality at all times. The Pro-Chlore range can be manufactured, on request, for seawater (Pro Chlore Salt AM Series). External control option (AP PR 60359-60361-60362, Smart Control 54523-4-5).

## SALT ELECTROLYSIS AND PH/CL CONTROL

### Nature Salt

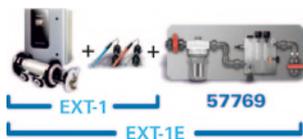

Nature Salt products have a sustainable cycle through the removal of chloramines, running through 2 grams of salt per liter and no chemical treatment. Self-cleaning commercial salt electrolysis system for use in public pools use up to 300 gr. chlorine / hour. TWIN-CELL Cell high pressure SYSTEM equipped with electrodes Nature Salt quality. Expanded functions by means of optional integrated control extensions (EXT-1, EXT 1E, EXT-2) or external panel extensions (AP PR Series 60359-60361-60362 and Smart Control Series 54523-4-5).

## WATER TREATMENT

# UV AUTOMATIC DISINFECTION FOR RESIDENTIAL POOLS

Neolysis, the most advanced water treatment by AstralPool: + Sustainability + Innovation + Disinfection + Healthy.

Advantages:

- Water suitable for watering.
- Dual disinfection based on UV and electrolysis.
- Unbeatable water quality.

Characteristics:

- The ultimate in chloramine reduction capacity (UV LP + Electrolysis).
- UV LP HO lamps (13,000 h).
- Patented process.

### Neolysis S (6 g/l) + UV for private pools

No need to add any extra salt. Natural conductivity in the operating range of 1.5–3 g/l depending on the temperature (28–35 °C) and nominal output (80–100%).

Fluidra Connect compatible

## WATER TREATMENT

# UV AUTOMATIC DISINFECTION FOR RESIDENTIAL POOLS

### Neolysis LS (1.5–3 g/l) + UV for private pools

No need to add any extra salt. Natural conductivity in the operating range of 1.5–3 g/l depending on the temperature (28–35 °C) and nominal output (80–100%).

# WATER TREATMENT

# AUTOMATIC UV DISINFECTION FOR PRIVATE POOLS

Neolysis, the most advanced water treatment by AstralPool: + Sustainability + Innovation + Disinfection + Healthy.

Advantages:

- Unbeatable water quality.
- Dual disinfection based on UV and electrolysis.

Characteristics:

- Two options: low salinity of 2–3 g/l (Neo LS) and standard salinity of 6 g/l (Neo S).
- The ultimate in chloramine reduction capacity (UV LP + Electrolysis).
- Self-cleaning electrodes that last 12,000–15,000 hours (NeoLS and Neo S).
- LP HO UV lamp (13,000 hours)
- Patented process.

# WATER TREATMENT CONTROL UNITS

## Control Basic Plus

Small in size, it has been designed to prevent siphoning, require little maintenance, be easy to install and is protected from the spraying of chemical products. The device automatically measures and checks a pool's pH or redox.

Supplied without sensors or calibration solutions. Installation kit included.

- Plastic housing with IP-65 protection rating
- Backlit LCD display comprising 2 lines and 16 characters.
- Self-calibration of electrodes.
- Quality control of electrodes.
- Dosing pause during alarms and notification by a blinking LED.
- Proportional dosing.
- Adjustable set point.
- Flow rate: 1,5 l/h or 5 l/h.
- Back pressure: 1.5 bar.
- pH measurement range: 0.00 to 14.00.
- Redox measurement range: -999 to + 999 mV.
- Switch.
- Alarm relay.
- Minimum chemical product level input.
- PT100 temperature input (optional sensor).

	Code	Std. Pack	Standard Weight kg	Standard Volume m <sup>3</sup>
Control Basic 1,5 l/h	<b>66159</b>	1	2,2	0,01

Flange for PT100	<b>66759</b>	1	-	-

# WATER TREATMENT CONTROL UNITS

## Redox Basic EV Plus

Small in size, it has been designed to prevent siphoning, require little maintenance, be easy to install and is protected from the spraying of chemical products. The device automatically measures and checks a pool's pH or redox. Recommended for use with Sel Pure, Sel Basic, Smart and Smart+ pH.

Supplied without sensors or calibration solutions. Installation kit included.

- Plastic housing with IP-65 protection rating
- Backlit LCD display comprising 2 lines and 16 characters.
- Self-calibration of electrodes.
- Quality control of electrodes.
- Dosing pause during alarms and notification by a blinking LED.
- Proportional dosing.
- Adjustable set point.
- Redox measurement range: -999 to + 999 mV.
- Switch.
- Alarm relay.
- Output relay for external component.
- Minimum chemical product level input.
- PT100 temperature input (optional sensor).

	Code	Std. Pack	Standard Weight kg	Standard Volume m <sup>3</sup>
Redox Basic EV Sensor not included	<b>66161</b>	1	2,1	0,01
Redox electrode with calibration solutions	<b>36005</b>	1	0,3	0,001
Optional:

Flange for PT100	<b>66759</b>	1	-	-

# WATER TREATMENT CONTROL UNITS

## Control Basic Doble pH-EV Plus

The DUAL pH-EV BASIC CONTROL dosing device has been specifically designed for automatically controlling pH and redox (ORP) levels.

It is a must in home spas and pools. It can work with a salt chlorinator or chlorine tablets, as it has relay output for enabling the chlorinator, in addition to controlling a pool's pH levels through a peristaltic pump.

It is the most simple control and dosing device in the market. Small in size, it has all of the components required for immediate installation.

Depending on the device that has been connected, the control function can be set to the ON-OFF setting or proportional setting (ideal for solenoid valves).

### General technical features:

- Automatic pH or redox control and dosing system.
- Measurement range of 0–14 (pH) and 0–100 mV (redox).
- It comes with a full installation kit, made up of a pH electrode, a probe holder, standard solutions, suction and blow pipes, and suction and blow pipe fittings.
- ABS casing with IP65 protection rating.
- Digital screen that gives pH, redox (ORP) and temperature (optional Pt100) readings
- Remote on-off input (230 VAC) that keeps display lit up for calibration and programming.
- Chemical product level inlet.
- Alarm relay.

	Code	Std. Pack	Standard Weight kg	Standard Volume m <sup>3</sup>
Dual pH-EV Basic Control 1.5 l/h compatible with Fluidra Connect (includes probes)	<b>66180</b>	1	-	-

# WATER TREATMENT CONTROL UNITS

## Optima

OPTIMA dosing pump with built-in pH/Redox control. pH/Redox instrument.  
Automatic calibration: Calibration by simply pressing a button, with the possibility of controlling the level of probe efficiency.

### Features:

- Power supply from 90 to 265 VAC 50/60 Hz.
- Manual temperature adjustment for pH or optional automatic adjustment with PT100.
- 4–20 mA for recording images and transmitting the average value.
- Level alert that disconnects the pump or a standard product failure alert from the alarm relay.
- Programmable setpoint deviation alert for the whole range of measurement.
- Dosing delay time for preventing the dosing pump from injecting products in the event of probe malfunction.
- Limited dosing pump flow rate to prevent accidental overdosing.
- Data programmed protected by password.
- Alarms may be connected.

Code	Std. Pack	Standard Weight kg	Standard Volume m <sup>3</sup>

# WATER TREATMENT CONTROL UNITS

## Controller

The panels in the CONTROLLER range are fully equipped and assembled systems, which are ideal for a number of water treatment applications. Their simple, compact design makes them extremely easy to instal and start up. They come with all of the components and accessories required for rapid assembly. All assemblies are made of PVC sheets, in various sizes depending on the model.

### General technical features:

- Range of available sizes depending of the probe selected.
- Range available for free chlorine: 0-2, 0-5 0-10, 0-20 and 0-200 ppm.
- pH range: 0-14. ORP range: +/-1,500 mV. Temperature range: 0-50 °C).
- Measurement of stable chlorine with low pH dependence.
- Self-calibration of all sizes.
- Alarm signal if water flow is insufficient.
- Instrument with IP65 protection rating.
- 250 V-10 A relays for connecting dosing pumps or salt chlorinators.
- 4-20 mA analogue outlets with repeat signal or manifold for proportional pumps.
- Power supply: 230 V / 50 Hz.
- Setpoints and programmable alarms.
- Pump pause function during calibration and for stopping flow.
- Temperature readings and readjustment (automatic with option PT100 probe).
- Three types of setpoint settings. On/Off, Proportional in Time and Proportional by Pulses.
- RS485 communications port.

### Components included in the assembly:

- Methacrylate probe holder, with flow rate regulator, sample-taking valve and flow rate sensor.
- Filter holder and an 80-micron nylon filter cartridge for water inlet.
- Standard DPD buffer solutions.
- Assembly accessories, and instruction and installation manual.
- Sensors depending on version.

# WATER TREATMENT CONTROL UNITS

## AP PR-200 - Compatible Electrolysis

The expert's choice for dosing control. The built-in panels based on Series AP PR controllers provide the best solution for the plug & play devices pre-assembled on the panel. There are several versions for the control of the water's pH, ORP and FREE CHLORINE levels.

AP PR-200 equipment is compatible with the Easy Salt, ProChlore Salt and Neolysis ranges

This is also the recommended solution for experts whenever several chlorination systems must be controlled at the same time from a single control and regulation panel (multiple control through the TIP kit).

\* Models with Cl<sub>2</sub> ppm: seawater can be used by substituting the gel electrolyte supplied with the standard unit for the gel electrolyte specifically for seawater (code 64658), which must be ordered separately.

# LIGHTING

## LED LIGHTING

### LumiPlus LED

Small in size, it has been designed to prevent siphoning, require little maintenance and be easy to instal. The LumiPlus LED system provides ambient lighting whenever desired in any colour for pools and aquatic facilities.

It comprises the LED spotlight, a LumiPlus modulator, a compatible Fluidra Connect module and a transformer, which are supplied separately.

The LEDs have a service life of 100,000 hours as opposed to 1,000 hours for conventional lamps and each LED spotlight saves upwards of 90% in power consumption.

The spotlights are fitted with red, green and blue LEDs of unbeatable brightness. The combination of these basic colours is able to emit an infinity of different colour high in luminosity and brightness.

# HEATING

## HEAT PUMPS

### AstralPool Heat II

AstralPool Toolbox app for IOS and Android

Web  
Heat pump configurator:  
[www.astralpool.com](http://www.astralpool.com) ->  
Calculation tools

Air/Water heat pump suitable for swimming pools and spas. It will allow you to extend the use of your outdoor pool in the summer season by taking advantage of the air in the atmosphere.

#### CHARACTERISTICS:

- Energy Saving. Operation mode COP: COP operation mode (Comprehensive Performance Operatinal) is based on knowing the energy efficiency of the machine during operation. To get to know the overall performance of the machine in real time the electronic card and reads the parameters appropriate sensors, performs the necessary calculations and adjusted to optimal performance at each facility.
- Wireless remote control that communicates by radio frequency through which we can have total control as the product on and off the machine, selecting heating or cooling mode (optional), selection of operating modes COP or ECO, selection of Pool or SPA heating (optional), change slogan, reading the temperature of the pool and outdoor temperature, alarm and signal flow.
- Alarm history and diagnosis of faults: It gives the team an alarm history and diagnosis of faults to be more effective in technical assistance and information available computer anywhere.
- Home automation devices compatible with Fluidra Connect. Remote control with functions such as start-stop, turning the heat up or down, choosing between the Filtration and Comfort modes, and selecting the power saving settings (ECO, EMO or none).
- Strong and light design in injected ABS+UV resistant to sun's radiation. Colour does not degrade.
- Long and high efficiency Evaporation Battery (gas-air exchanger) made of copper and aluminium fins, suitable for corrosive environments and costal locations.
- Axial fan with Engine of direct coupling.
- SCROLL compressors with internal protection.
- Titanium Condensers made with a PVC casing and TITANIUM G2 coil according to ASTM B 338.99 standard. Granted against corrosion.
- R-407\_C full charge.
- and deoxidised copper.
- Refrigeration circuit of dehydrated, nitrogenated and deoxidised copper.
- Expansion via thermostatic valve, with external balancing unit.
- Dehydrating filter.
- Hydraulic circuit with water inlet flow switch made of PVC, good elasticity and high resistance against fissures, imperative for hot and pressured liquid transportation.
- Electrical cabinet with high sensibility digital regulation and filtering pump control. Keyboard blocking.
- Display protection cover.
- Intelligent Heat: This system maintains automatically the set temperature of the swimming pool or spa, controlling the filtering system.
- Phase Monitor: Protects the compressor against losses and phase inversion.
- Defrost: Activating the fan, the unit defrosts the evaporator.
- New ECO system: In stopping periods, it maintains the installation at a closer temperature to the set temperature to save energy.

#### OPTIONAL:

- Gas defrosting: the unit can work at temperatures lower than 5°C, defrosting the evaporator if needed. Only with the reversible option.
- Possibility of heating pool or spa: Optional power with the same heat a pool or spa equipment and its control of three-way valves (not included) and the system debugger.
- Wintering cover

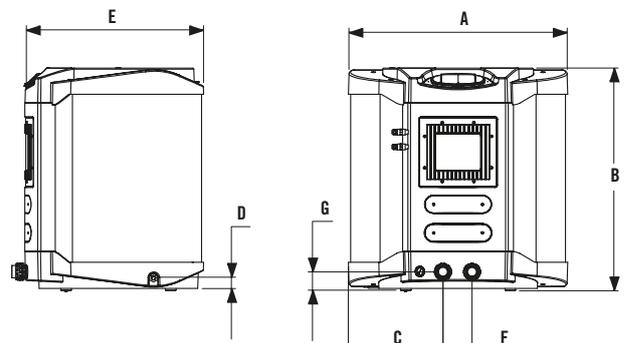

# HEATING

## HEAT EXCHANGERS

### Compact ElectricHeat

**EXTERNALLY:**

- New linear configuration that offers ease of installation.
- New, more compact and simpler “all in” design. Simple and elegant lines.
- New, clearer and simpler user interface, now with touch sensors and next-generation OLED display.
- More information for the user in a more intuitive fashion.
- New electrical connection system, simpler and faster.

Fluidra Connect compatible

**INTERNALLY:**

- Simplicity of components: the internal components have been simplified and reduced.
- Replaceable parts: now the internal components are easy to access and replace.
- New electronic control, more accurate and secure.
- New software & hardware capable of detecting faults in plant and equipment.
- New electric actuation, without moving parts, more reliability and noiseless.
- Standard model with Incoloy resistance, Titanium model with resistances in titanium.
- Model specifically for Fluidra Connect.

**Fluidra Connect versions**

- Compact 3 Titanium
- Compact 6 Titanium
- Compact 9 Titanium
- Compact 12 Titanium
- Compact 18 Titanium

# FILTRATION

## FILTRATION PUMPS

### Viron variable speed pumps

Variable speed pumps are born as a new concept of pool pump. Variable speed pumps Astralpool Viron are the most efficient solution for the pool and their performance can be adapted according to the installation and user needs. By increasing and decreasing their speed, not only modify the speed and flow-rate, but also energy consumption.

Halving the speed of the pump is able to reduce the energy consumed in more than 85%. In addition, variable speed pumps Viron are controlled through an LCD display with backlighting showing RPM and have 4 timer settings for each day, allowing different speed settings.

AstralPool range in VIRON variable speed pumps is:

**Viron P320:** Ideal for the average sized pool, the P320 eVo has a flow rate sufficient to back wash up 800 mm diameter sand filters. The LCD display shows the RPM of the motor and provides up to four time periods each day with different speed settings to provide the perfect flow rate for the pool. The factory preset speeds incorporating the P320 model offers the following approximate flow rates: High: 292lpm Mid: 206lpm Low: 128lpm.

**Viron P600:** The Viron P600 eVo is capable of the most demanding applications with high flow and high pressure all the while delivering the utmost in energy efficiency. In addition the P600 eVo incorporates electronic power factor correction which provides even further reductions in power consumption, even on maximum speed. The factory preset speeds incorporating the P320 model offers the following approximate flow rates: High: 600lpm Mid: 426lpm Low: 200lpm.

## AUTOMATIC MULTIPORT VALVES

### System VRAC II Basic automatic multiport valve

Automatic multiport valve model provided with push button keyboard for operation. Controls filtration, backwashing, rinsing and emptying.

- Adaptability: Adapts to all installations with a sand filter and installed quickly and easily.
- Comfort: With a simple programming using the keypad, you will receive a fully automated filtration of your pool.
- Hygiene: To obtain an optimal water quality for swimming, filtration runs every day, optimizing the wash cycles.
- Security: The Basic Bulk System automatic valve continuously monitors the filtration system, thus avoiding potential mishaps with your filtration.
- New informative LEDs.

**Note:** It is recommended that the multiport safety valve (codes 41898, 41899) be fitted.

# ASTRALPOOL MAC®

## ASTRALPOOL MAC®

### AstralPool MAC®

AstralPool has launched a unique product in the market to create a new concept in pool management that will revolutionise the sector worldwide.

AstralPool MAC® is not just an innovative product, it has introduced a new concept in the way we understand and manage pools, and will truly revolutionise the sector worldwide. AstralPool MAC®, the ultimate smart device for the physical and chemical control and maintenance of pools. AstralPool MAC® makes possible the full and intuitive control of pools thanks to its Smart Manager software, which enables users to adjust all pool settings (efficiency levels, filtration, dosing, temperature, etc.) from a touch screen display.

AstralPool MAC® has been developed for old and new pools alike of up to 80 m3. It ensures that equipment runs at maximum efficiency by making savings of up to 50% on energy, 90% on chemical products and 50% on the amount of water used for backwashing in comparison with conventional pools. AstralPool MAC® is made up of two small modules (74.5 x 99.5 x 66.5 cm) that are compact, light enough to carry from one place to another and easy to install.

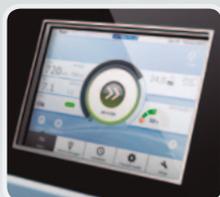

Furthermore, AstralPool MAC® can be remotely operated over a Wi-Fi network.

More information also available at [www.astralpoolmac.com](http://www.astralpoolmac.com).

**AstralPool MAC® manages maintenance for you**

### Welcome to the 3.0 pool

Control your pool with just one finger, from your home or office, using your smartphone or tablet. A true lesson in industrial engineering to make life easier for you. AstralPool MAC® is the celebration of technology working for mankind.
