

CTX-230 Dosilong

DESCRIPTION:

Dispenser which contains disinfectant products, flocculants and algaecides for the maintenance of the swimming pool water.

PROPERTIES:

Appearance.....	Bell-shaped vase with perforable marks.
Colour	white
Weight.....	2 Kg.

CHARACTERISTICS

This dispenser prevents water from algae and maintains the pool water clear and transparent.

DOSAGE AND INSTRUCTIONS OF USE

Punch the circular marks (in both sides) from 50 m³ to 200 m³ of water depending of the swimming pool volume. Punch a hole in the round marks with a sharp object (for instance a scissors) and you will easily obtain the necessary holes for water gets inside it.

Initial treatment: super chlorination.
Put the dispenser into the water and let it float.

Maintain a residual chlorine concentration between 0.5-2 ppm.

Attention: Don't refill this dispenser. It is for one use only.
